The competition reaches the quarter-final stage and for the remaining musicians, it's all to play for.

Presented by star saxophonist and broadcaster Jess Gillam, herself a former BBC Young Musician finalist, it's time for the first six musicians to perform again for the judges, this time in front of an audience. With such a high standard of talent to choose from, the judges have their work cut out as the competition heats up and tensions mount.

The judges are looking for one winner on the night to go through automatically to the next stage. For the remaining contestants there's still a chance to progress, but we'll have to wait until next week to discover who the judges choose as their four wild cards.

SUN 21:00 BBC Proms (m001b0dr)
2022

The Magic of Mozart

Mozart was a child prodigy who rejected norms and rewrote the rule book. Tonight's concert opens with the overture from The Marriage of Figaro, an opera that changed music and challenged the social status quo.

Our performers for this Prom are also out of the ordinary. The international Mahler Chamber Orchestra's members are drawn from 20 countries. They are joined by their multi-Grammy-nominated artistic partner, Norwegian Leif Ove Andsnes, who plays piano and directs the orchestra, as Mozart did, from the keyboard.

Together they explore the relationship between soloist and ensemble in the ever-popular, dark and stormy Piano Concerto No 20, and Piano Concerto No 22, in which Mozart pushes orchestral boundaries with the introduction of the then-exotic clarinet.

Join Katie Derham and guests for a lively concert of Wolfgang Amadeus.

Bursting with some of his most beautiful and heartfelt melodies, Rachmaninov's sweeping Second Symphony continues the celebration of what would have been the composer's 150th birthday.

Music by the conductor's father opens the concert - Ivan Karabits' first Concerto for Orchestra. Written to mark the 1,500th anniversary of the founding of Kyiv, it's a colourful orchestral soundscape evoking chiming bells and a city in happier times.

MON 23:30 Truman and Tennessee: An Intimate Conversation (m0011fb0)

Truman Capote and Tennessee Williams – writers, celebrities and, many would say, geniuses – were catapulted to fame in the 1950s, sparking a friendship and rivalry that spanned nearly 40 years. Inextricably entwined and icons of their age, they were both creative powerhouses and gay men, who dealt with success and its evanescence in vastly different ways.

Film-maker Lisa Immordino Vreeland brings these two forces together in a unique and fascinating head-to-head, comparing and contrasting their trajectories through duelling voices – the writers' own, culled from archival footage, and those of actors Jim Parsons and Zachary Quinto, who portray Capote and Williams at various stages of their lives.

Both writers constructed rich, imaginary worlds and characters - Blanche DuBois and Holly Golightly to mention just two - which left indelible marks on the era. Both men also paid the price of colossal success and fame, suffering alcoholism and periods of artistic stagnation.

With the help of a key insider from the Trump campaign's digital operation, Jamie unravels for the first time the role played by social media and Facebook's vital role in getting Trump into the White House. But how did Facebook become such a powerful player?

Jamie learns how Facebook's vast power to persuade was first built for advertisers, combining data about our internet use and psychological insights into how we think. A leading psychologist then shows Jamie how Facebook's hoard of data about us can be used to predict our personalities and other psychological traits. He interrogates the head of the big data analytics firm that targeted millions of voters on Facebook for Trump - he tells Jamie this revolution is unstoppable. But is this great persuasion machine now out of control? Exploring the emotional mechanisms that supercharge the spread of fake news on social media, Jamie reveals how Silicon Valley's persuasion machine is now being exploited by political forces of all kinds, in ways no one - including the Tech Gods who created it - may be able to stop.

WEDNESDAY 02 OCTOBER 2024

WED 19:00 Life (b00nj6dr)

Reptiles and Amphibians

Reptiles and amphibians look like hang-overs from the past. But they overcome their shortcomings through amazing innovation.

The pebble toad turns into a rubber ball to roll and bounce from its enemies. Extreme slow-motion shows how a Jesus Christ lizard runs on water, and how a chameleon fires an extendible tongue at its prey with unflinching accuracy. The camera dives with a Niuean sea snake, which must breed on land but avoids predators by swimming to an air bubble at the end of an underwater tunnel. In a TV first, komodo dragons hunt a huge water-buffalo, biting it to inject venom, then waiting for weeks until it dies. Ten dragons strip the carcass to the bone in four hours.

WED 20:00 PQ17: An Arctic Convoy Disaster (b03n3297)

Jeremy Clarkson tells the dramatic story of the Arctic convoys of the Second World War, from Russia to the freezing Arctic Ocean.

Accompanied by moving first hand testimony from the men who served on these convoys, Clarkson reveals the incredible hazards faced by members of the Merchant and Royal Navy who delivered vital war supplies via the Arctic to the Soviet Union: temperatures of minus 50 degrees, huge icebergs, colossal waves, not to mention German U-boats and the Luftwaffe. It is no wonder that Churchill described the Arctic Convoys as 'the worst journey in the world.'

Between 1941 and 1945, more than 70 convoys delivered 4 million tonnes of material to the USSR, yet one convoy in particular would come to symbolise the dangers faced by the men who served on them. Codenamed PQ17, this convoy of 35 merchant ships would be described by Churchill as one of the most melancholy naval episodes of the war.

Retracing the route of PQ17 from the Arctic to the Russian winter port of Archangel, Clarkson reveals how, on the night of July 4th 1942, this joint Anglo-American convoy became one of the biggest naval disasters of the 20th century. To make matters worse, the cause of the disaster lay not in the brutal conditions of the Arctic, or the military might of the Germans, but a misjudgement made in the corridors of the Admiralty in London.

WED 21:00 The Hunt for Lady Olive and the German Submarine (m0023k9p)

A great maritime mystery lies deep beneath the waters of the Channel Islands. On the morning of 19 February 1917, German submarine UC-18 opened fire on Royal Navy Q-ship the Lady Olive. As the U-boat drew near to assess the damage it had inflicted, the Lady Olive counter-attacked. Both vessels were said to have sunk. For decades, divers and historians have searched to discover their fate and understand the fascinating story that led to this encounter, but no-one has come close to finding the wrecks.

The documentary follows film-maker Karl Taylor and his specialist team over four years as they search to discover what happened on that fateful February day in 1917.

Directed by Karl Taylor

Narrator David Harewood

Principal Underwater Photography, Karl Taylor and Peter Frankland

WED 22:00 Philip Glenister and Matthew Graham Remember... Life on Mars (m0023k9r)

Philip Glenister fires up the Cortina GXL one more time and takes a trip back in time to reflect on the hugely popular 1970s-set drama series Life on Mars, with writer and creator Matthew Graham joining him for the ride.

Together, they discuss the challenges of recreating the 70s, analyse why Life on Mars seemed to grab the public's imagination from the very beginning, and share their memories of creating and playing one of television's greatest unreconstructed tough men: hard-drinking, chain-smoking, skull-cracking DCI Gene Hunt.

WED 22:30 Life on Mars (b0074scz)

Series 1

Episode 1

Drama series about Sam Tyler, a Manchester detective who suffers a near-fatal car crash and wakes up in what seems to be 1973. Unsure whether he's in a coma, has really time-travelled or has just gone mad, Tyler's 21st-century attitudes make him a fish out of water in this world of clunky technology and old-fashioned policing. Then he discovers a connection between a murder in 1973 and the 2006 kidnapping case he was working on, and solving this case could be the key to getting home.

A gyroscopically stabilised camera moves alongside migrating caribou, and a diving team swim among the planet's biggest fight as male humpback whales battle for a female.
